Lesson - 1

Human Evolution

Answer the following:

Q1. Why did early humans lead a nomadic life?

Ans. Early humans lead a nomadic life as they travelled from one place to another in search of food, water and shelter.

Q2. Which stone was commonly used to make tools? Why?

Ans. Flint, a type of stone, was widely used to make tools and weapons as it chipped easily and could be moulded in different shapes.

Q3. How was discovery of fire useful?

Ans. The discovery of fire was useful because fire was used to keep warm, keep animals away and for cooking food.

Q4. How did agriculture change the life of early man?

Ans. Agriculture change the life of early man because they were now producers rather than gatherers.

Q5 Name the various sources of information of early man's life.

Ans The various sources of information of early man's life are:-

- a) Fossils and Bones
- b) Pottery and Utensils
- c) Cave paintings
- d) Tools
- e) Pit Houses
